

Getting you on ►  
the right circuit!

## About Us

The strong pillars of Master Trading has been established by Late Shri Rajmal Jain in the year 1970, with growing prospects and attributes we decided to incorporate ourselves being more stronger and bigger with Master Trading Corporation (MASTER) in 2002, since then there has been no looking back. We keep our principles and ethics on poise. With the vast experience and practical knowledge in electrical field Mr. Vijay kumar Jain has taken it to new heights. We have been the leading suppliers for branded electrical products & pioneering the supply chain industry in most parts of Bangalore & South India. Bringing up the change with modern technologies and amenities. Mr. Kishore V Jain has joined them and brought new marketing strategies to take the market by storm and serve to more customers with utmost competence, reliability, prompt delivery & assurance.

We at MASTER, encompass a complete line of general and special purpose Commercial and Industrial Electrical Products for a wide variety of applications. We value our ability and dedication to execute on our projects and deliver upon all our commitments. Our esteemed customers rely on us for the most prompt and reliable service.

### Our product range consists of:

Domestic: Wires & Cables, Switchgears, LED lighting solutions, switches & accessories, fans, pipes & fitting.

Industrial: LT / HT XLPE Cables ranges from 24v to 33kv, industrial circuit breakers, industrial switchgears & electrical safety equipments.

We source our products directly from the manufacturer or authorized distributor, thus the client is sure to get genuine products & competitive pricing without compromising on the authenticity & quality.

Master Trading Corporation is an end to end solution for all your electrical needs. Which is taken care with passion & enthusiasm leading to perfection in quality & customer satisfaction.

## Vision

“Vision is the art of seeing the invisible.”

People expect good service but only few are willing to give it. The most important part in a communication is hearing ‘what isn’t said’. Ready for anything that may occur and quick to respond to customer needs and concerns.

## Mission

“We strive to deliver nothing but excellence in all our services to our clients”

Continuous improvement of service, leading to total customer satisfaction.

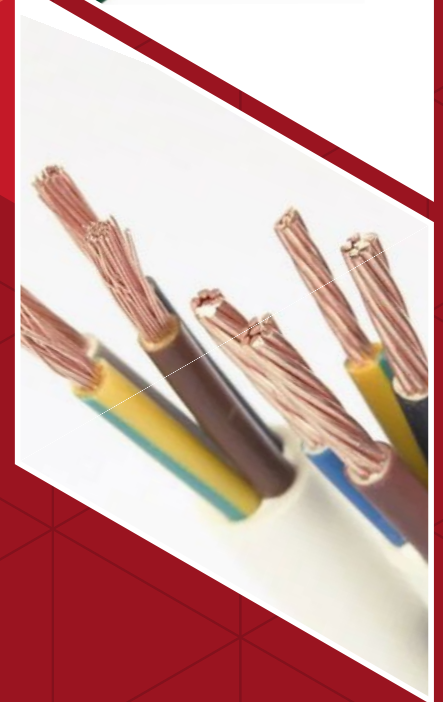

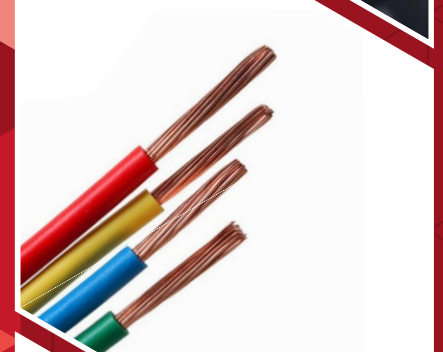

Our objective is commitment to the higher quality products and customer services. The client satisfaction is our main focus, reached through innovative and cost effective security services.

# Wires

WIRE is considered the nerves system of any building. Electrical wiring is the connection between electrical devices using insulated conductors. The insulated conductors here are used to carry electricity. They are usually known as wires or cables. To get the safety of electrical wiring it is very important to know the type of cable being used. According to the international standards confirming to IS 694 FR (Flame Retardant) FRLS (Flame Retardant Low Smoke)

We at MASTER, have an in depth knowledge of wires or cables & their application to help you choose the right wire as per requirement. We have a vast range of cables ranging from all the sizes, variety and color code available right in stock. The range includes RG 6 co axial cable, speaker wire, shielded cable, telephone cable, Data cable (Cat 6/5e/5), CCTV cable.

We are Authorized distributors & channel partners with global brands like:

# Cables

Cable is backbone of any building, just like wires running through it. A power cable is an electrical cable, an assembly of one or more electrical conductors, usually held together with an overall sheath. The assembly is used for transmission of electrical power. Power cables may be installed as permanent wiring within buildings, buried in the ground, run overhead, or exposed.

Flexible power cables are used for portable devices, mobile tools, and machinery.

We at MASTER, help you choose the right cable with exact technical details of cable and the power consumed by the same. We have a wide range of stock available at our warehouse holding multi core cable, LT (Low Tension) cable & HT (High Tension) cable. We also have the accessories required for the cable installation like lugs, gland, indoor/outdoor pothead, jointing kits which makes the work easier and seamless without having been run around to different places.

# Switch Gear

In an electric power system, switchgear is composed of electrical disconnect switches, fuses or circuit breakers used to control, protect and isolate electrical equipment. A miniature circuit breaker (MCB) automatically switches off electrical circuit during an abnormal condition of the network means in overload condition as well as faulty condition. Nowadays we use an MCB in low voltage electrical network instead of a fuse.

We at MASTER, make sure the that safety of a customer residing in the building adheres to all the safety measures to protect the building with the help of using MCB & RCCB and other necessary accessories to the circuits.

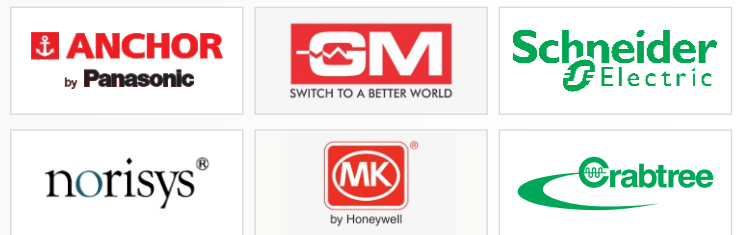

In Industrial we cater to control panel equipments like contactors, relays, MCCB, Change over switch, main switch & other accessories adjoining to it. As, Industrial switchgears keep innovating, we always keep the customers updated about the latest products available & which is in trend to the latest technological change in the industrial need.

# Switches

Switches for lighting or electrical equipment may be in hand-held devices. The switch mounting boxes, or enclosures are often recessed within a finished wall. Surface mounting of enclosures is also fairly common though is seen more in commercial industrial and outbuilding settings than in residential structures. There are variety of modular switches which caters to the requirement. It ranges from basic, designer, remote controlled, exclusive tange of switches.

We at MASTER, have dedicated staff to knowledge you about the plenty of options available in switch range where in you get to select switches & plates suiting to your comfort. We're always eager to suggest you the most suitable options keeping in mind customers budget & color options, which helps them understanding application/ utility.

# Lights

Light-emitting diodes, or LEDs, are widely used as a standard source of light in electrical equipment. LEDs themselves have been around for some time, but only recently have improvements in efficiency, cost and output made them viable for the larger-scale lighting used in households, businesses and other environments. Due to the rapid progress in LED technologies, products exist with wide ranges of efficiencies and life spans. It finds usage in many such areas because of its long-lasting capability, low power requirements, swift response time and fast switching capabilities. LED light bulbs are a more environmentally-friendly alternative to incandescent bulbs.

At MASTER, our idea is to offer our clients an array of modern new design & combination that they can choose from LED lighting. We are known for our innovative product range, design, quality & affordable pricing. Lights supplied by us are of top notch quality keeping in mind the vibrant modern design & quality. Our serviced markets is towards industrial, commercial, residential & other markets. We are inclined towards Architects, Interiors, Contractors, builders, home owners & others.
